Study Plan — 2 Topics a Day (Sunday to Friday)

This file is made by `tools/build_study_plan.py` from the real documents. Do not edit it by hand — run the script again when the documents change.

How to use this plan

- **Every study day (Sunday to Friday) has 2 items.** Do them in order. One item is about 1 to 2 hours of focused work.
- **For a topic:** click the link, read the topic slowly, and write 3 to 5 lines of notes in your own words. When a topic is the first one of a new document, first read that document's short "The Story" part at the top.
- **For practice:** try the exercise by yourself first. Use Hint 1, then Hint 2, only after you really tried. Look at the solution last.
- **When you finish an item, tick it off:** change `☐` to `☑` in the Done? column.
- **Saturday is not a new-topic day.** It is the revision and catch-up day. The Saturday row lists every item of that week again, with its link. Open each one, read it quickly, and check that you still understand it. Also finish anything you did not finish.
- **If you fall behind,** do not skip items. Just move forward from where you are — the dates are a guide, not a rule.

How items were chosen

- **Topics:** every `###` topic inside a document's **Core Concepts** part is 1 item. Documents with no Core Concepts (like Doc15, Doc17, Doc18) use their main reading parts instead — each one is 1 item (a part with sub-parts is split into 1 item per sub-part).
- **Practice exercises:** after a document's topics, its practice exercises are grouped **2 exercises per item**.
- **Build Task:** a document's Build Task takes **2 items** (build it, then check it with its Test Cases). When a document says "You Can Now Build Project N", its Build Task is only a summary of that project, so it is not scheduled twice — you build the project instead.
- **Projects:** a project starts right after the document that unlocks it (from the Project ↔ Document map in CURRICULUM.md, or the document's own "You Can Now Build Project N" part). Its Setup is 1 item, and every Step is **2 items** (build it, then test it). Main projects come before bonus projects.
- **Bonus projects** are included. They are optional: if you skip one, just continue with the next row and your dates move earlier.

In total: 316 items = 122 topics + 57 practice items + 16 Build Task items + 121 project items, over **158 study days** in **27 weeks** (from 20 Sep 2026 to 27 Mar 2027).

Summary

Week	Dates	What you study
Week 1	20 Sep 2026 – 26 Sep 2026	Doc01, Doc02
Week 2	27 Sep 2026 – 03 Oct 2026	Doc02, Doc03
Week 3	04 Oct 2026 – 10 Oct 2026	Doc03, Doc04
Week 4	11 Oct 2026 – 17 Oct 2026	Doc04, Project 1, Doc05
Week 5	18 Oct 2026 – 24 Oct 2026	Doc05, Project 6
Week 6	25 Oct 2026 – 31 Oct 2026	Project 6, Doc06
Week 7	01 Nov 2026 – 07 Nov 2026	Doc06
Week 8	08 Nov 2026 – 14 Nov 2026	Doc06, Project 7, Doc07
Week 9	15 Nov 2026 – 21 Nov 2026	Doc07, Project 2
Week 10	22 Nov 2026 – 28 Nov 2026	Project 2, Project 8
Week 11	29 Nov 2026 – 05 Dec 2026	Project 8, Doc08
Week 12	06 Dec 2026 – 12 Dec 2026	Doc08, Project 9
Week 13	13 Dec 2026 – 19 Dec 2026	Project 9, Doc08b
Week 14	20 Dec 2026 – 26 Dec 2026	Doc09
Week 15	27 Dec 2026 – 02 Jan 2027	Doc09, Project 10
Week 16	03 Jan 2027 – 09 Jan 2027	Project 10, Doc10
Week 17	10 Jan 2027 – 16 Jan 2027	Doc10, Project 3
Week 18	17 Jan 2027 – 23 Jan 2027	Doc11, Project 4
Week 19	24 Jan 2027 – 30 Jan 2027	Project 4, Project 11
Week 20	31 Jan 2027 – 06 Feb 2027	Project 11, Project 12
Week 21	07 Feb 2027 – 13 Feb 2027	Project 12, Doc12
Week 22	14 Feb 2027 – 20 Feb 2027	Doc13, Doc14
Week 23	21 Feb 2027 – 27 Feb 2027	Doc14, Doc15, Doc16
Week 24	28 Feb 2027 – 06 Mar 2027	Doc16, Doc17, Doc18

Week	Dates	What you study
Week 25	07 Mar 2027 – 13 Mar 2027	Doc19, Project 5
Week 26	14 Mar 2027 – 20 Mar 2027	Project 5, Project 13
Week 27	21 Mar 2027 – 27 Mar 2027	Project 13

Week 1 (20 Sep 2026 – 26 Sep 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	20 Sep 2026	**Doc01** · Functions, types, and why they matter	**Doc01** · Errors: a clean way to say "something specific went wrong"	☐
Mon	21 Sep 2026	**Doc01** · Virtual environments: keeping projects separate	**Doc01** · `.env` files: keeping secrets out of your code	☐
Tue	22 Sep 2026	**Doc01** · Logging: better than `print()`	**Doc01 practice (1 of 4)** · Basic — typed function + custom error · Basic (part 2) — a real venv, start to finish	☐
Wed	23 Sep 2026	**Doc01 practice (2 of 4)** · Intermediate — read `.env` by hand, then explain why not to · Intermediate (part 2) — a logger with two output levels	**Doc01 practice (3 of 4)** · Real-world — wire config + logging together · Edge cases — is an empty value "missing" or "valid"?	☐
Thu	24 Sep 2026	**Doc01 practice (4 of 4)** · Failure handling — three different errors, three different reactions	**Doc01 Build Task (part 1 of 2)** · Build it: Config & Logging Foundation	☐
Fri	25 Sep 2026	**Doc01 Build Task (part 2 of 2)** · Finish and check it against the Test Cases	**Doc02** · HTTP: a request gets a response	☐
Sat	26 Sep 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again,	**Revise this week: Doc01:** Functions, types, and why they matter · Errors: a clean way to say "something specific went wrong" · Virtual environments: keeping projects separate · `.env` files: keeping secrets out of your code · Logging: better than `print()` ·	☐

Day	Date	Topic 1	Topic 2	Done?
		and redo 1 practice exercise from this week without hints.	Basic — typed function + custom error · Basic (part 2) — a real venv, start to finish · Intermediate — read `.env` by hand, then explain why not to · Intermediate (part 2) — a logger with two output levels · Real-world — wire config + logging together · Edge cases — is an empty value "missing" or "valid"? · Failure handling — three different errors, three different reactions · Build Task: Config & Logging Foundation; **Doc02:** HTTP: a request gets a response	

Week 2 (27 Sep 2026 – 03 Oct 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	27 Sep 2026	**Doc02** · Timeouts: the failure that never tells you it's happening	**Doc02** · Retrying with exponential backoff and jitter	☐
Mon	28 Sep 2026	**Doc02** · JSON: two different kinds of "wrong"	**Doc02 practice (1 of 3)** · Basic — your first real API call · Intermediate — timeouts and retry-with-backoff	☐
Tue	29 Sep 2026	**Doc02 practice (2 of 3)** · Real-world — one reusable session instead of repeated headers · Edge cases — 200 doesn't mean safe to trust	**Doc02 practice (3 of 3)** · Failure — respecting a real rate limit	☐
Wed	30 Sep 2026	**Doc02 Build Task (part 1 of 2)** · Build it: HTTP Client Wrapper	**Doc02 Build Task (part 2 of 2)** · Finish and check it against the Test Cases	☐
Thu	01 Oct 2026	**Doc03** · Tokens: what the model actually reads	**Doc03** · Context window: a shared budget, not just "how much you can paste in"	☐
Fri	02 Oct 2026	**Doc03** · No memory: there's nothing "remembered" inside the model	**Doc03** · Randomness: `temperature` and `top_p`	☐

Day	Date	Topic 1	Topic 2	Done?
Sat	03 Oct 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc02:** Timeouts: the failure that never tells you it's happening · Retrying with exponential backoff and jitter · JSON: two different kinds of "wrong" · Basic — your first real API call · Intermediate — timeouts and retry-with-backoff · Real-world — one reusable session instead of repeated headers · Edge cases — 200 doesn't mean safe to trust · Failure — respecting a real rate limit · Build Task: HTTP Client Wrapper; **Doc03:** Tokens: what the model actually reads · Context window: a shared budget, not just "how much you can paste in" · No memory: there's nothing "remembered" inside the model · Randomness: `temperature` and `top_p`	☐

Week 3 (04 Oct 2026 – 10 Oct 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	04 Oct 2026	**Doc03** · Cost: input and output tokens are priced differently	**Doc03** · Making things up: not a bug, just how the model works	☐
Mon	05 Oct 2026	**Doc03 practice (1 of 3)** · Basic — guess token counts, then check · Intermediate — temperature and cost, side by side	**Doc03 practice (2 of 3)** · Real-world — how long can this conversation actually go? · Edge cases — where the ¾-word rule breaks	☐
Tue	06 Oct 2026	**Doc03 practice (3 of 3)** · Failure — make it confidently wrong, on purpose	**Doc04** · The client, and the list of messages	☐
Wed	07 Oct 2026	**Doc04** · Streaming vs. waiting for the full reply	**Doc04** · Structured output: how "give me JSON" is actually guaranteed	☐
Thu	08 Oct 2026	**Doc04** · Error types, and which Doc02 rules apply to each	**Doc04** · Chat Completions vs. the newer Responses API	☐
Fri	09 Oct	**Doc04 practice (1 of 3)** · Basic — your	**Doc04 practice (2 of 3)** · Real-world — make it feel alive with streaming · Edge cases — what actually	☐

Day	Date	Topic 1	Topic 2	Done?
	2026	first real API call · Intermediate — build real memory	happens when you go over the limit	
Sat	10 Oct 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc03:** Cost: input and output tokens are priced differently · Making things up: not a bug, just how the model works · Basic — guess token counts, then check · Intermediate — temperature and cost, side by side · Real-world — how long can this conversation actually go? · Edge cases — where the ¾-word rule breaks · Failure — make it confidently wrong, on purpose; **Doc04:** The client, and the list of messages · Streaming vs. waiting for the full reply · Structured output: how "give me JSON" is actually guaranteed · Error types, and which Doc02 rules apply to each · Chat Completions vs. the newer Responses API · Basic — your first real API call · Intermediate — build real memory · Real-world — make it feel alive with streaming · Edge cases — what actually happens when you go over the limit	☐

Week 4 (11 Oct 2026 – 17 Oct 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	11 Oct 2026	**Doc04 practice (3 of 3)** · Failure — a bad key, and a cost comparison	**Project 1** · SupportDesk (Concierge & Triage) — Setup (plan it first: the 7 steps)	☐
Mon	12 Oct 2026	**Project 1** · Build Step 1 — A Script That Sends One Message and Prints the Reply (part 1 of 2)	**Project 1** · Test and finish Step 1 (part 2 of 2)	☐
Tue	13 Oct 2026	**Project 1** · Build Step 2 — A Real Terminal Chat With Memory and Live Streaming (part 1 of 2)	**Project 1** · Test and finish Step 2 (part 2 of 2)	☐
Wed	14 Oct 2026	**Project 1** · Build Step 3 — A Triage Agent That Extracts a Structured Ticket From Free Text (part 1 of 2)	**Project 1** · Test and finish Step 3 (part 2 of 2)	☐
Thu	15 Oct 2026	**Project 1** · Build Step 4 — A Router That Sends Each Message to the Right Agent	**Project 1** · Test and finish Step 4 (part 2 of 2), then go through the Checklist Before You Call This Done	☐

Day	Date	Topic 1	Topic 2	Done?
		Automatically (final: 2 agents) (part 1 of 2)		
Fri	16 Oct 2026	**Doc05** · What a library gives you, and what it costs	**Doc05** · `ChatOpenAI` : a wrapper, not a different model	☐
Sat	17 Oct 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc04:** Failure — a bad key, and a cost comparison; **Project 1:** Setup · Step 1 · Step 2 · Step 3 · Step 4; **Doc05:** What a library gives you, and what it costs · `ChatOpenAI` : a wrapper, not a different model	☐

Week 5 (18 Oct 2026 – 24 Oct 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	18 Oct 2026	**Doc05** · Prompt templates: keeping the fixed part separate from the changing part	**Doc05** · LCEL: chaining pieces together with `|`	☐
Mon	19 Oct 2026	**Doc05** · Output parsers: turning raw text into a real Python object	**Doc05** · The three LangChain packages: `langchain-core` , `langchain-openai` , `langchain`	☐
Tue	20 Oct 2026	**Doc05 practice (1 of 3)** · Basic — your first LCEL chain · Intermediate — swap in a structured parser	**Doc05 practice (2 of 3)** · Real-world — rebuild a Project 1 feature, LCEL-style · Edge cases — a template with the wrong variables	☐
Wed	21 Oct 2026	**Doc05 practice (3 of 3)** · Failure — force the parser to actually fail	**Doc05 Build Task (part 1 of 2)** · Build it: Reusable Chain Module	☐
Thu	22 Oct 2026	**Doc05 Build Task (part 2 of 2)** · Finish and check it against the Test Cases	**Project 6 (bonus)** · LangChainPro (Production LCEL Patterns) — Setup (plan it first: the 7 steps)	☐

Day	Date	Topic 1	Topic 2	Done?
Fri	23 Oct 2026	**Project 6 (bonus)** · Build Step 1 — A Classifier That Sends Each Ticket to the Right Reply Chain (part 1 of 2)	**Project 6 (bonus)** · Test and finish Step 1 (part 2 of 2)	☐
Sat	24 Oct 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc05:** Prompt templates: keeping the fixed part separate from the changing part · LCEL: chaining pieces together with `|` · Output parsers: turning raw text into a real Python object · The three LangChain packages: `langchain-core`, `langchain-openai`, `langchain` · Basic — your first LCEL chain · Intermediate — swap in a structured parser · Real-world — rebuild a Project 1 feature, LCEL-style · Edge cases — a template with the wrong variables · Failure — force the parser to actually fail · Build Task: Reusable Chain Module; **Project 6:** Setup · Step 1	☐

Week 6 (25 Oct 2026 – 31 Oct 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	25 Oct 2026	**Project 6 (bonus)** · Build Step 2 — Customer Lookups That Run at the Same Time (part 1 of 2)	**Project 6 (bonus)** · Test and finish Step 2 (part 2 of 2)	☐
Mon	26 Oct 2026	**Project 6 (bonus)** · Build Step 3 — Retries, Then a Safe Fallback, When a Model Call Fails (part 1 of 2)	**Project 6 (bonus)** · Test and finish Step 3 (part 2 of 2)	☐
Tue	27 Oct 2026	**Project 6 (bonus)** · Build Step 4 — Stream the Reply Live and Build One Structured Record per Ticket (part 1 of 2)	**Project 6 (bonus)** · Test and finish Step 4 (part 2 of 2), then go through the Checklist Before You Call This Done	☐
Wed	28 Oct 2026	**Doc06** · A tool's description is really a prompt	**Doc06** · Checking arguments: Pydantic as the contract	☐

Day	Date	Topic 1	Topic 2	Done?
Thu	29 Oct 2026	**Doc06** · Choosing between multiple tools	**Doc06** · Getting a tool's failure back to the model, correctly	☐
Fri	30 Oct 2026	**Doc06** · Seeing the whole thing three ways — analogy, trace, and code, side by side	**Doc06** · Parallel tool calls	☐
Sat	31 Oct 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Project 6:** Step 2 · Step 3 · Step 4; **Doc06:** A tool's description is really a prompt · Checking arguments: Pydantic as the contract · Choosing between multiple tools · Getting a tool's failure back to the model, correctly · Seeing the whole thing three ways — analogy, trace, and code, side by side · Parallel tool calls	☐

Week 7 (01 Nov 2026 – 07 Nov 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	01 Nov 2026	**Doc06** · Forcing or forbidding tool use (`tool_choice`)	**Doc06** · Chaining tool calls across multiple turns	☐
Mon	02 Nov 2026	**Doc06** · Security: tools are a real attack surface	**Doc06** · Prompt injection: when the attack comes from content, not the user	☐
Tue	03 Nov 2026	**Doc06** · What MCP actually is, and the problem it solves	**Doc06** · MCP's 3 building blocks: Tools, Resources, and Prompts	☐
Wed	04 Nov 2026	**Doc06** · MCP servers and clients, and how they actually connect	**Doc06** · Why MCP matters for the multi-agent systems this curriculum builds	☐
Thu	05 Nov 2026	**Doc06 practice (1 of 3)** · Basic — your first working tool · Intermediate — watch the model choose between two tools	**Doc06 practice (2 of 3)** · Real-world — a tool backed by a real API call · Edge cases — a missing required argument	☐

Day	Date	Topic 1	Topic 2	Done?
Fri	06 Nov 2026	**Doc06 practice (3 of 3)** · Failure — a crashing tool, and a bad description	**Doc06 Build Task (part 1 of 2)** · Build it: Tool Library	☐
Sat	07 Nov 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc06:** Forcing or forbidding tool use (`tool_choice`) · Chaining tool calls across multiple turns · Security: tools are a real attack surface · Prompt injection: when the attack comes from content, not the user · What MCP actually is, and the problem it solves · MCP's 3 building blocks: Tools, Resources, and Prompts · MCP servers and clients, and how they actually connect · Why MCP matters for the multi-agent systems this curriculum builds · Basic — your first working tool · Intermediate — watch the model choose between two tools · Real-world — a tool backed by a real API call · Edge cases — a missing required argument · Failure — a crashing tool, and a bad description · Build Task: Tool Library	☐

Week 8 (08 Nov 2026 – 14 Nov 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	08 Nov 2026	**Doc06 Build Task (part 2 of 2)** · Finish and check it against the Test Cases	**Project 7 (bonus)** · MCPForge (MCP Server) — Setup (plan it first: the 7 steps)	☐
Mon	09 Nov 2026	**Project 7 (bonus)** · Build Step 1 — A Minimal Server With One Tool (part 1 of 2)	**Project 7 (bonus)** · Test and finish Step 1 (part 2 of 2)	☐
Tue	10 Nov 2026	**Project 7 (bonus)** · Build Step 2 — A Real SQLite-Backed Store, and the Search Tool (part 1 of 2)	**Project 7 (bonus)** · Test and finish Step 2 (part 2 of 2)	☐
Wed	11 Nov 2026	**Project 7 (bonus)** · Build Step 3 — Add the Resource and the Prompt (part 1 of 2)	**Project 7 (bonus)** · Test and finish Step 3 (part 2 of 2)	☐
Thu	12 Nov 2026	**Project 7 (bonus)** · Build Step 4 — A Real Client That Connects and Uses All Three (part 1 of 2)	**Project 7 (bonus)** · Test and finish Step 4 (part 2 of 2), then go through the Checklist Before You Call This Done	☐

Day	Date	Topic 1	Topic 2	Done?
Fri	13 Nov 2026	**Doc07** · The ReAct loop: think → act → observe	**Doc07** · The scratchpad: how the loop remembers its own steps	☐
Sat	14 Nov 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc06:** Build Task: Tool Library; **Project 7:** Setup · Step 1 · Step 2 · Step 3 · Step 4; **Doc07:** The ReAct loop: think → act → observe · The scratchpad: how the loop remembers its own steps	☐

Week 9 (15 Nov 2026 – 21 Nov 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	15 Nov 2026	**Doc07** · Setting a limit on the number of steps	**Doc07** · Common single-agent failures, worth naming now	☐
Mon	16 Nov 2026	**Doc07** · Agent memory: what actually persists between calls	**Doc07** · Planning before acting	☐
Tue	17 Nov 2026	**Doc07** · When NOT to use an agent	**Doc07** · Evaluating an agent, not just a single call	☐
Wed	18 Nov 2026	**Doc07 practice (1 of 3)** · Basic — trace the loop on paper first · Intermediate — build the loop yourself	**Doc07 practice (2 of 3)** · Real-world — compare your loop to the library's · Edge cases — a task that needs no tool at all	☐
Thu	19 Nov 2026	**Doc07 practice (3 of 3)** · Failure — watch it loop, then measure the cost of looping at all	**Project 2** · ResearchHand (Worker & Verifier) — Setup (plan it first: the 7 steps)	☐
Fri	20 Nov 2026	**Project 2** · Build Step 1 — A Single LCEL Chain That Answers One Question, No Tools (part 1 of 2)	**Project 2** · Test and finish Step 1 (part 2 of 2)	☐

Day	Date	Topic 1	Topic 2	Done?
Sat	21 Nov 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc07:** Setting a limit on the number of steps · Common single-agent failures, worth naming now · Agent memory: what actually persists between calls · Planning before acting · When NOT to use an agent · Evaluating an agent, not just a single call · Basic — trace the loop on paper first · Intermediate — build the loop yourself · Real-world — compare your loop to the library's · Edge cases — a task that needs no tool at all · Failure — watch it loop, then measure the cost of looping at all; **Project 2:** Setup · Step 1	☐

Week 10 (22 Nov 2026 – 28 Nov 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	22 Nov 2026	**Project 2** · Build Step 2 — One Tool, One Loop: the Smallest Possible Working Agent (part 1 of 2)	**Project 2** · Test and finish Step 2 (part 2 of 2)	☐
Mon	23 Nov 2026	**Project 2** · Build Step 3 — Scaling to 3+ Tools With a Hard Step Limit and Failure Recovery (part 1 of 2)	**Project 2** · Test and finish Step 3 (part 2 of 2)	☐
Tue	24 Nov 2026	**Project 2** · Build Step 4 — A Verifier Agent That Catches the Worker's Bad Answers (final: 2 agents) (part 1 of 2)	**Project 2** · Test and finish Step 4 (part 2 of 2), then go through the Checklist Before You Call This Done	☐
Wed	25 Nov 2026	**Project 8 (bonus)** · MCPBridge (MCP Client Agent) — Setup (plan it first: the 7 steps)	**Project 8 (bonus)** · Build Step 1 — Connect to One MCP Server and List Its Tools (part 1 of 2)	☐
Thu	26 Nov 2026	**Project 8 (bonus)** · Test and finish Step 1 (part 2 of 2)	**Project 8 (bonus)** · Build Step 2 — A Real ReAct Agent That Calls a Discovered Tool (part 1 of 2)	☐
Fri	27 Nov 2026	**Project 8 (bonus)** · Test and finish Step 2 (part 2 of 2)	**Project 8 (bonus)** · Build Step 3 — Multiple MCP Servers at Once, With Tool Namespacing (part 1 of 2)	☐
Sat	28 Nov	**Revision day — no new topics.** Finish any item you did not tick this week. Then	**Revise this week: Project 2:** Step 2 · Step 3 · Step 4;	☐

Day	Date	Topic 1	Topic 2	Done?
	2026	read your notes again, and redo 1 practice exercise from this week without hints.	**Project 8:** Setup · Step 1 · Step 2 · Step 3	

Week 11 (29 Nov 2026 – 05 Dec 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	29 Nov 2026	**Project 8 (bonus)** · Test and finish Step 3 (part 2 of 2)	**Project 8 (bonus)** · Build Step 4 — A Fallback When a Server Is Unreachable, and a Full Working Demo (part 1 of 2)	☐
Mon	30 Nov 2026	**Project 8 (bonus)** · Test and finish Step 4 (part 2 of 2), then go through the Checklist Before You Call This Done	**Doc08** · Embeddings: meaning turned into geometry	☐
Tue	01 Dec 2026	**Doc08** · Chunking: why where you split matters more than it seems like it should	**Doc08** · Vector stores and searching for the top matches	☐
Wed	02 Dec 2026	**Doc08** · "Lost in the middle": more text isn't automatically better	**Doc08** · RAG changes what gets made up — it doesn't remove the problem	☐
Thu	03 Dec 2026	**Doc08** · Hybrid search: combining keyword and vector search	**Doc08** · Reranking: a second, more careful pass over the top results	☐
Fri	04 Dec 2026	**Doc08** · Metadata filtering	**Doc08** · Evaluating a RAG system	☐
Sat	05 Dec 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Project 8:** Step 3 · Step 4; **Doc08:** Embeddings: meaning turned into geometry · Chunking: why where you split matters more than it seems like it should · Vector stores and searching for the top matches · "Lost in the middle": more text isn't automatically better · RAG changes what gets made up — it doesn't remove the problem · Hybrid search: combining keyword and vector search · Reranking: a second, more careful pass over the top results · Metadata filtering · Evaluating a RAG system	☐

Week 12 (06 Dec 2026 – 12 Dec 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	06 Dec 2026	**Doc08** · RAG-specific prompt injection: your own knowledge base can attack your own agent	**Doc08** · Exposing your retriever as an MCP tool	☐
Mon	07 Dec 2026	**Doc08 practice (1 of 3)** · Basic — see embeddings as geometry, not theory · Intermediate — chunking method changes the answer	**Doc08 practice (2 of 3)** · Real-world — build and search a real knowledge base · Edge cases — when the answer spans two chunks	☐
Tue	08 Dec 2026	**Doc08 practice (3 of 3)** · Failure — a bad split, and a `k` comparison	**Doc08 Build Task (part 1 of 2)** · Build it: Retriever Module	☐
Wed	09 Dec 2026	**Doc08 Build Task (part 2 of 2)** · Finish and check it against the Test Cases	**Project 9 (bonus)** · PromptShield (Injection-Hardened RAG Agent) — Setup (plan it first: the 7 steps)	☐
Thu	10 Dec 2026	**Project 9 (bonus)** · Build Step 1 — A Normal RAG Agent, and Proving It's Vulnerable (part 1 of 2)	**Project 9 (bonus)** · Test and finish Step 1 (part 2 of 2)	☐
Fri	11 Dec 2026	**Project 9 (bonus)** · Build Step 2 — The Core Defense: Marking Retrieved Content as Data, Not Instructions (part 1 of 2)	**Project 9 (bonus)** · Test and finish Step 2 (part 2 of 2)	☐
Sat	12 Dec 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc08:** RAG-specific prompt injection: your own knowledge base can attack your own agent · Exposing your retriever as an MCP tool · Basic — see embeddings as geometry, not theory · Intermediate — chunking method changes the answer · Real-world — build and search a real knowledge base · Edge cases — when the answer spans two chunks · Failure — a bad split, and a `k` comparison · Build Task:	☐

Day	Date	Topic 1	Topic 2	Done?
			Retriever Module; **Project 9:** Setup · Step 1 · Step 2	

Week 13 (13 Dec 2026 – 19 Dec 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	13 Dec 2026	**Project 9 (bonus)** · Build Step 3 — A Second Layer: Scanning Retrieved Content for Injection Patterns (part 1 of 2)	**Project 9 (bonus)** · Test and finish Step 3 (part 2 of 2)	☐
Mon	14 Dec 2026	**Project 9 (bonus)** · Build Step 4 — A Real Red-Team Test Suite (part 1 of 2)	**Project 9 (bonus)** · Test and finish Step 4 (part 2 of 2), then go through the Checklist Before You Call This Done	☐
Tue	15 Dec 2026	**Doc08b** · The event loop: one thread, many waiting tasks	**Doc08b** · Why async helps waiting-on-something work, and does nothing for heavy-computing work	☐
Wed	16 Dec 2026	**Doc08b** · `asyncio.gather`: running things at the same time instead of one after another	**Doc08b** · Sync vs. async client: same tool, different way of running	☐
Thu	17 Dec 2026	**Doc08b** · Common mistakes, and why they're sneaky	**Doc08b practice (1 of 3)** · Basic — your first coroutine · Intermediate — feel the speed difference	☐
Fri	18 Dec 2026	**Doc08b practice (2 of 3)** · Real-world — convert a real function to async · Edge cases — proving `gather` actually waits	**Doc08b practice (3 of 3)** · Failure — accidentally blocking the event loop	☐
Sat	19 Dec 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Project 9:** Step 3 · Step 4; **Doc08b:** The event loop: one thread, many waiting tasks · Why async helps waiting-on-something work, and does nothing for heavy-computing work · `asyncio.gather`: running things at the same time instead of one after another · Sync vs. async client: same tool, different way of running · Common mistakes, and why they're sneaky · Basic — your first	☐

Day	Date	Topic 1	Topic 2	Done?
			coroutine · Intermediate — feel the speed difference · Real-world — convert a real function to async · Edge cases — proving `gather` actually waits · Failure — accidentally blocking the event loop	

Week 14 (20 Dec 2026 – 26 Dec 2026)

Day	Date	Topic 1	Topic 2	Done?
Sun	20 Dec 2026	**Doc09** · LangChain vs. LangGraph vs. RAG — how these three actually relate	**Doc09** · Tool-calling inside a graph, and the path from one agent to many	☐
Mon	21 Dec 2026	**Doc09** · From a hidden loop to a clear graph	**Doc09** · State: one typed object flowing through the graph	☐
Tue	22 Dec 2026	**Doc09** · Nodes and edges, including conditional edges	**Doc09** · Loops: on purpose, not by accident	☐
Wed	23 Dec 2026	**Doc09** · Checkpointers: saved state that survives a pause	**Doc09** · `interrupt()` : pausing for a human	☐
Thu	24 Dec 2026	**Doc09** · Parallel branches (fan-out / fan-in)	**Doc09** · Subgraphs: a graph as one node in a bigger graph	☐
Fri	25 Dec 2026	**Doc09** · Streaming a graph's execution	**Doc09** · Debugging a graph visually	☐
Sat	26 Dec 2026	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc09:** LangChain vs. LangGraph vs. RAG — how these three actually relate · Tool-calling inside a graph, and the path from one agent to many · From a hidden loop to a clear graph · State: one typed object flowing through the graph · Nodes and edges, including conditional edges · Loops: on purpose, not by accident · Checkpointers: saved state that survives a pause · `interrupt()` : pausing for a human · Parallel branches (fan-out / fan-in) · Subgraphs: a	☐

Day	Date	Topic 1	Topic 2	Done?
			graph as one node in a bigger graph · Streaming a graph's execution · Debugging a graph visually	

Week 15 (27 Dec 2026 – 02 Jan 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	27 Dec 2026	**Doc09** · Long-term memory: remembering across separate conversations	**Doc09 practice (1 of 3)** · Basic — your first graph · Intermediate — real branching	☐
Mon	28 Dec 2026	**Doc09 practice (2 of 3)** · Real-world — rebuild Project 2 as a graph · Edge cases — an unhandled routing value	**Doc09 practice (3 of 3)** · Failure — an endless loop, and a real pause/resume	☐
Tue	29 Dec 2026	**Doc09 Build Task (part 1 of 2)** · Build it: Graph Skeleton (feeds into Project 3)	**Doc09 Build Task (part 2 of 2)** · Finish and check it against the Test Cases	☐
Wed	30 Dec 2026	**Project 10 (bonus)** · MemoryKeeper (Persistent Cross-Session Memory) — Setup (plan it first: the 7 steps)	**Project 10 (bonus)** · Build Step 1 — A Normal Graph With Only Short-Term (Checkpointer) Memory (part 1 of 2)	☐
Thu	31 Dec 2026	**Project 10 (bonus)** · Test and finish Step 1 (part 2 of 2)	**Project 10 (bonus)** · Build Step 2 — Add a Long-Term Store, and a Node That Reads From It (part 1 of 2)	☐
Fri	01 Jan 2027	**Project 10 (bonus)** · Test and finish Step 2 (part 2 of 2)	**Project 10 (bonus)** · Build Step 3 — Deciding What's Worth Remembering, and Writing It Back (part 1 of 2)	☐
Sat	02 Jan 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc09:** Long-term memory: remembering across separate conversations · Basic — your first graph · Intermediate — real branching · Real-world — rebuild Project 2 as a graph · Edge cases — an unhandled routing value · Failure — an endless loop, and a real pause/resume · Build Task: Graph Skeleton (feeds into Project 3); **Project 10:** Setup · Step 1 · Step 2 · Step 3	☐

Week 16 (03 Jan 2027 – 09 Jan 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	03 Jan 2027	**Project 10 (bonus)** · Test and finish Step 3 (part 2 of 2)	**Project 10 (bonus)** · Build Step 4 — Forgetting, and a Privacy-Respecting Delete (part 1 of 2)	☐
Mon	04 Jan 2027	**Project 10 (bonus)** · Test and finish Step 4 (part 2 of 2), then go through the Checklist Before You Call This Done	**Doc10** · Search as a routed step, not something that always runs	☐
Tue	05 Jan 2027	**Doc10** · Why "agentic RAG" is really a graph problem, not a search problem	**Doc10** · State must carry what was found, not just what was asked	☐
Wed	06 Jan 2027	**Doc10** · Multi-step search: when one search isn't enough	**Doc10** · Combining retrieval with tool calls	☐
Thu	07 Jan 2027	**Doc10** · Caching search results within one run	**Doc10** · When human approval should block vs. just notify	☐
Fri	08 Jan 2027	**Doc10 practice (1 of 3)** · Basic — plug search in as a plain tool first · Intermediate — make search conditional	**Doc10 practice (2 of 3)** · Real-world — a real approval pause · Edge cases — search comes back empty	☐
Sat	09 Jan 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Project 10:** Step 3 · Step 4; **Doc10:** Search as a routed step, not something that always runs · Why "agentic RAG" is really a graph problem, not a search problem · State must carry what was found, not just what was asked · Multi-step search: when one search isn't enough · Combining retrieval with tool calls · Caching search results within one run · When human approval should block vs. just notify · Basic — plug search in as a plain tool first · Intermediate — make search conditional · Real-world — a real approval pause · Edge cases — search comes back empty	☐

Week 17 (10 Jan 2027 – 16 Jan 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	10 Jan 2027	**Doc10 practice (3 of 3)** · Failure — search fails mid-run	**Project 3** · DocuMind (Retriever, Reasoner & Approval) — Setup (plan it first: the 7 steps)	☐
Mon	11 Jan 2027	**Project 3** · Build Step 1 — A 2-Node Graph With No Branching, Just to Prove the Mechanics (part 1 of 2)	**Project 3** · Test and finish Step 1 (part 2 of 2)	☐
Tue	12 Jan 2027	**Project 3** · Build Step 2 — Saved State and a Human Pause Before Anything Goes Out (part 1 of 2)	**Project 3** · Test and finish Step 2 (part 2 of 2)	☐
Wed	13 Jan 2027	**Project 3** · Build Step 3 — A Retriever Agent That Judges Its Own Search Results (part 1 of 2)	**Project 3** · Test and finish Step 3 (part 2 of 2)	☐
Thu	14 Jan 2027	**Project 3** · Build Step 4 — A Reasoner Agent That Only Answers From What the Retriever Found (part 1 of 2)	**Project 3** · Test and finish Step 4 (part 2 of 2)	☐
Fri	15 Jan 2027	**Project 3** · Build Step 5 — An Approval Agent That Only Asks a Human When It Really Needs To (final: 3 agents) (part 1 of 2)	**Project 3** · Test and finish Step 5 (part 2 of 2), then go through the Checklist Before You Call This Done	☐
Sat	16 Jan 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc10:** Failure — search fails mid-run; **Project 3:** Setup · Step 1 · Step 2 · Step 3 · Step 4 · Step 5	☐

Week 18 (17 Jan 2027 – 23 Jan 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	17 Jan 2027	**Doc11** · The real question: one agent, or many?	**Doc11** · Every pattern below: what / why / when / trade-off	☐
Mon	18 Jan 2027	**Doc11** · The `Command` tool: today's way of handing work between agents	**Doc11** · Shared state design: what goes in the shared state, and what doesn't	☐

Day	Date	Topic 1	Topic 2	Done?
Tue	19 Jan 2027	**Doc11** · Error propagation between agents	**Doc11** · Cost and latency: multi-agent is not free	☐
Wed	20 Jan 2027	**Doc11** · Agent-to-agent communication patterns beyond the `Command` tool	**Doc11 practice (1 of 3)** · Basic — design on paper before touching code · Intermediate — measure the sequential version	☐
Thu	21 Jan 2027	**Doc11 practice (2 of 3)** · Real-world — build and compare the supervisor version · Edge cases — an ambiguous routing decision	**Doc11 practice (3 of 3)** · Failure — a loop that won't converge, and a cost-cutting pass	☐
Fri	22 Jan 2027	**Project 4** · ContentForge (Supervisor-Led Team) — Setup (plan it first: the 7 steps)	**Project 4** · Build Step 1 — One Specialist's Drafting Logic, Working Alone, No Agent Behavior (part 1 of 2)	☐
Sat	23 Jan 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc11:** The real question: one agent, or many? · Every pattern below: what / why / when / trade-off · The `Command` tool: today's way of handing work between agents · Shared state design: what goes in the shared state, and what doesn't · Error propagation between agents · Cost and latency: multi-agent is not free · Agent-to-agent communication patterns beyond the `Command` tool · Basic — design on paper before touching code · Intermediate — measure the sequential version · Real-world — build and compare the supervisor version · Edge cases — an ambiguous routing decision · Failure — a loop that won't converge, and a cost-cutting pass; **Project 4:** Setup · Step 1	☐

Week 19 (24 Jan 2027 – 30 Jan 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	24 Jan 2027	**Project 4** · Test and finish Step 1 (part 2 of 2)	**Project 4** · Build Step 2 — That Specialist, Now a Real Agent	☐

Day	Date	Topic 1	Topic 2	Done?
			That Can Improve Its Own Work (part 1 of 2)	
Mon	25 Jan 2027	**Project 4** · Test and finish Step 2 (part 2 of 2)	**Project 4** · Build Step 3 — A Research Agent That Looks Things Up Before Anyone Else Works (part 1 of 2)	☐
Tue	26 Jan 2027	**Project 4** · Test and finish Step 3 (part 2 of 2)	**Project 4** · Build Step 4 — An Analysis Agent That Turns Raw Research Into Organized Findings (part 1 of 2)	☐
Wed	27 Jan 2027	**Project 4** · Test and finish Step 4 (part 2 of 2)	**Project 4** · Build Step 5 — The Full Team: a Supervisor Routing 4 Specialists via Command (final: 5 agents) (part 1 of 2)	☐
Thu	28 Jan 2027	**Project 4** · Test and finish Step 5 (part 2 of 2), then go through the Checklist Before You Call This Done	**Project 11 (bonus)** · MCPCrew (Multi-Agent Research Team) — Setup (plan it first: the 7 steps)	☐
Fri	29 Jan 2027	**Project 11 (bonus)** · Build Step 1 — Two Standalone MCP-Connected Specialists (part 1 of 2)	**Project 11 (bonus)** · Test and finish Step 1 (part 2 of 2)	☐
Sat	30 Jan 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Project 4:** Step 1 · Step 2 · Step 3 · Step 4 · Step 5; **Project 11:** Setup · Step 1	☐

Week 20 (31 Jan 2027 – 06 Feb 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	31 Jan 2027	**Project 11 (bonus)** · Build Step 2 — A Supervisor Routes Between Them (part 1 of 2)	**Project 11 (bonus)** · Test and finish Step 2 (part 2 of 2)	☐
Mon	01 Feb 2027	**Project 11 (bonus)** · Build Step 3 — The Writer Agent Synthesizes a Final Report (part 1 of 2)	**Project 11 (bonus)** · Test and finish Step 3 (part 2 of 2)	☐
Tue	02 Feb 2027	**Project 11 (bonus)** · Build Step 4 — Graceful Degradation When One MCP Server Is Down (part 1 of 2)	**Project 11 (bonus)** · Test and finish Step 4 (part 2 of 2), then	☐

Day	Date	Topic 1	Topic 2	Done?
			go through the Checklist Before You Call This Done	
Wed	03 Feb 2027	**Project 12 (bonus)** · MCPResearch (Agentic Pipeline as an MCP Tool) — Setup (plan it first: the 7 steps)	**Project 12 (bonus)** · Build Step 1 — The Two-Agent Pipeline, Running Standalone (No MCP Yet) (part 1 of 2)	☐
Thu	04 Feb 2027	**Project 12 (bonus)** · Test and finish Step 1 (part 2 of 2)	**Project 12 (bonus)** · Build Step 2 — Wrap It as a Single MCP Tool (part 1 of 2)	☐
Fri	05 Feb 2027	**Project 12 (bonus)** · Test and finish Step 2 (part 2 of 2)	**Project 12 (bonus)** · Build Step 3 — Report Internal Progress Without Breaking the One-Tool Illusion (part 1 of 2)	☐
Sat	06 Feb 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Project 11:** Step 2 · Step 3 · Step 4; **Project 12:** Setup · Step 1 · Step 2 · Step 3	☐

Week 21 (07 Feb 2027 – 13 Feb 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	07 Feb 2027	**Project 12 (bonus)** · Test and finish Step 3 (part 2 of 2)	**Project 12 (bonus)** · Build Step 4 — A Timeout and a Partial-Result Fallback (part 1 of 2)	☐
Mon	08 Feb 2027	**Project 12 (bonus)** · Test and finish Step 4 (part 2 of 2), then go through the Checklist Before You Call This Done	**Doc12** · FastAPI: request/response shapes are Pydantic again, one layer up	☐
Tue	09 Feb 2027	**Doc12** · Database storage: what to save, and why start with SQLite	**Doc12** · Docker: what a container actually is, and why it exists	☐
Wed	10 Feb 2027	**Doc12** · Caching: what's safe, and what isn't	**Doc12 practice (1 of 3)** · Basic — your first FastAPI route · Intermediate — wrap real logic behind a route	☐

Day	Date	Topic 1	Topic 2	Done?
Thu	11 Feb 2027	**Doc12 practice (2 of 3)** · Real-world — persist and read back real data · Edge cases — a request that fails validation	**Doc12 practice (3 of 3)** · Failure — a dead connection, and a real container	☐
Fri	12 Feb 2027	**Doc12 Build Task (part 1 of 2)** · Build it: Project 4 as an API	**Doc12 Build Task (part 2 of 2)** · Finish and check it against the Test Cases	☐
Sat	13 Feb 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Project 12:** Step 3 · Step 4; **Doc12:** FastAPI: request/response shapes are Pydantic again, one layer up · Database storage: what to save, and why start with SQLite · Docker: what a container actually is, and why it exists · Caching: what's safe, and what isn't · Basic — your first FastAPI route · Intermediate — wrap real logic behind a route · Real-world — persist and read back real data · Edge cases — a request that fails validation · Failure — a dead connection, and a real container · Build Task: Project 4 as an API	☐

Week 22 (14 Feb 2027 – 20 Feb 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	14 Feb 2027	**Doc13** · Why testing something that isn't always the same needs a different mindset	**Doc13** · The testing layers, and what each one actually checks	☐
Mon	15 Feb 2027	**Doc13** · Regression testing for prompts	**Doc13** · Test sets and LLM-as-a-judge	☐
Tue	16 Feb 2027	**Doc13** · Watching your system: what to record for each run	**Doc13 practice (1 of 3)** · Basic — a normal, exact test · Intermediate — test a tool without calling the LLM	☐
Wed	17 Feb 2027	**Doc13 practice (2 of 3)** · Real-world — score an answer that	**Doc13 practice (3 of 3)** · Failure — prove the suite actually catches a regression	☐

Day	Date	Topic 1	Topic 2	Done?
		isn't exact · Edge cases — fix a flaky test		
Thu	18 Feb 2027	**Doc13 Build Task (part 1 of 2)** · Build it: Test Suite for Project 4	**Doc13 Build Task (part 2 of 2)** · Finish and check it against the Test Cases	☐
Fri	19 Feb 2027	**Doc14** · Why "real cause" and "just the symptom" are different things	**Doc14** · Reading an error trace as a map, not noise	☐
Sat	20 Feb 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc13:** Why testing something that isn't always the same needs a different mindset · The testing layers, and what each one actually checks · Regression testing for prompts · Test sets and LLM-as-a-judge · Watching your system: what to record for each run · Basic — a normal, exact test · Intermediate — test a tool without calling the LLM · Real-world — score an answer that isn't exact · Edge cases — fix a flaky test · Failure — prove the suite actually catches a regression · Build Task: Test Suite for Project 4; **Doc14:** Why "real cause" and "just the symptom" are different things · Reading an error trace as a map, not noise	☐

Week 23 (21 Feb 2027 – 27 Feb 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	21 Feb 2027	**Doc14** · Reproduce before you guess	**Doc14** · Debugging systems with many layers	☐
Mon	22 Feb 2027	**Doc14 practice (1 of 4)** · Python · API	**Doc14 practice (2 of 4)** · OpenAI · LangChain	☐
Tue	23 Feb 2027	**Doc14 practice (3 of 4)** · RAG · LangGraph	**Doc14 practice (4 of 4)** · Multi-agent	☐

Day	Date	Topic 1	Topic 2	Done?
Wed	24 Feb 2027	**Doc15** · Read: Project Index	**Doc15 practice (1 of 1)** · Basic — run the 7-step process on a mini scenario	☐
Thu	25 Feb 2027	**Doc16** · Unclear requirements are the real test	**Doc16** · Requirements → architecture is matching, not inspiration	☐
Fri	26 Feb 2027	**Doc16** · Non-functional requirements shape the design just as much as functional ones	**Doc16** · Defending a design when it's pushed on	☐
Sat	27 Feb 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc14:** Reproduce before you guess · Debugging systems with many layers · Python · API · OpenAI · LangChain · RAG · LangGraph · Multi-agent; **Doc15:** Project Index · Basic — run the 7-step process on a mini scenario; **Doc16:** Unclear requirements are the real test · Requirements → architecture is matching, not inspiration · Non-functional requirements shape the design just as much as functional ones · Defending a design when it's pushed on	☐

Week 24 (28 Feb 2027 – 06 Mar 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	28 Feb 2027	**Doc16 practice (1 of 2)** · Basic — a simple single-agent design · Intermediate — a multi-agent pipeline design	**Doc16 practice (2 of 2)** · Real-world — unclear, conflicting requirements	☐
Mon	01 Mar 2027	**Doc17** · Read: The Four-Depth Format (used for every question)	**Doc17** · Read: Question Coverage (per document you've already finished): Document 01 — Python Foundations	☐
Tue	02 Mar 2027	**Doc17** · Read: Question Coverage (per document you've already	**Doc17** · Read: Question Coverage (per document you've already finished): Document 11 — Multi-Agent Systems	☐

Day	Date	Topic 1	Topic 2	Done?
		finished): Document 08 — RAG		
Wed	03 Mar 2027	**Doc17 practice (1 of 2)** · Basic — cold recall · Intermediate — apply the follow-up template yourself	**Doc17 practice (2 of 2)** · Real-world — a cold interview on your own project	☐
Thu	04 Mar 2027	**Doc18** · Read: What You'll Be Given (not designed for you)	**Doc18** · Read: What You'll Design and Build	☐
Fri	05 Mar 2027	**Doc18 practice (1 of 2)** · Basic — critique your own Stage-1 design before you build · Intermediate — defend one non-obvious trade-off under pushback	**Doc18 practice (2 of 2)** · Real-world — a cold design-review interview on your finished capstone	☐
Sat	06 Mar 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc16:** Basic — a simple single-agent design · Intermediate — a multi-agent pipeline design · Real-world — unclear, conflicting requirements; **Doc17:** The Four-Depth Format (used for every question) · Question Coverage (per document you've already finished): Document 01 — Python Foundations · Question Coverage (per document you've already finished): Document 08 — RAG · Question Coverage (per document you've already finished): Document 11 — Multi-Agent Systems · Basic — cold recall · Intermediate — apply the follow-up template yourself · Real-world — a cold interview on your own project; **Doc18:** What You'll Be Given (not designed for you) · What You'll Design and Build · Basic — critique your own Stage-1 design before you build · Intermediate — defend one non-obvious trade-off under pushback · Real-world — a cold design-review interview on your finished capstone	☐

Week 25 (07 Mar 2027 – 13 Mar 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	07 Mar 2027	**Doc19** · MLOps vs. LLMOps: what's actually different here	**Doc19** · Versions for prompts/settings: treating them as real, tracked things	☐
Mon	08 Mar 2027	**Doc19** · CI/CD for agent systems: the test suite as a release gate	**Doc19** · Ways to release: canary, blue-green, and shadow	☐
Tue	09 Mar 2027	**Doc19** · Watching for slow decline: cost, speed, and quality over time	**Doc19** · Rolling back: the real safety net	☐
Wed	10 Mar 2027	**Doc19** · Backup plans if your provider has an outage	**Doc19 practice (1 of 3)** · Basic — a simple version log · Intermediate — build the gate	☐
Thu	11 Mar 2027	**Doc19 practice (2 of 3)** · Real-world — act out a canary release · Edge cases — a bad release that slips past the gate	**Doc19 practice (3 of 3)** · Failure — a real rollback trigger	☐
Fri	12 Mar 2027	**Project 5** · ContentForge Pro (Production Platform) — Setup (plan it first: the 7 steps)	**Project 5** · Build Step 1 — ContentForge, Reachable Over HTTP for the First Time (part 1 of 2)	☐
Sat	13 Mar 2027	**Revision day — no new topics.** Finish any item you did not tick this week. Then read your notes again, and redo 1 practice exercise from this week without hints.	**Revise this week: Doc19:** MLOps vs. LLMOps: what's actually different here · Versions for prompts/settings: treating them as real, tracked things · CI/CD for agent systems: the test suite as a release gate · Ways to release: canary, blue-green, and shadow · Watching for slow decline: cost, speed, and quality over time · Rolling back: the real safety net · Backup plans if your provider has an outage · Basic — a simple version log · Intermediate — build the gate · Real-world — act out a canary release · Edge cases — a bad release that slips past the gate · Failure — a real rollback trigger; **Project 5:** Setup · Step 1	☐

Week 26 (14 Mar 2027 – 20 Mar 2027)

Day	Date	Topic 1	Topic 2	Done?
Sun	14 Mar 2027	**Project 5** · Test and finish Step 1 (part 2 of 2)	**Project 5** · Build Step 2 — Every Run Saved to a Database and Findable by ID (part 1 of 2)	☐
Mon	15 Mar 2027	**Project 5** · Test and finish Step 2 (part 2 of 2)	**Project 5** · Build Step 3 — Containerized and Rate-Limited: Runs the Same Everywhere, Survives Abuse (part 1 of 2)	☐
Tue	16 Mar 2027	**Project 5** · Test and finish Step 3 (part 2 of 2)	**Project 5** · Build Step 4 — A Test Suite That Catches a Bad Change Before It Ships (final) (part 1 of 2)	☐
